## Jeep Wrangler Installation Instructions

1. This is how the grille will appear when finished.

2. remove the screws (2) indicated by the red arrow (1 each side).

3. Loosen the screws (3) on each side of the radiator and remove atleast the top ones to permit access to the back of the grille. This depends on the size of your arm.

4. Looking from underneath the vehicle remove the push-in fasteners that attach the rubber shroud to the body. You will need access here later when attaching the grille.

5. Insert the grille material in between the radiator and the body. Be sure the front is facing out. The front has a smoother feel as the punch runs from the front to the back.

6. Another view showing the grille material going in between the radiator and frame.

7. Attach the grille to the chassis at two points on the bottom and two along the top. The tie wraps will be visible. As an option you can use some stick on tie wrap pads to the backside of the frame. You are DONE!
